## Form Request on WordPress

Before create form please checking your IMA Builder version, only support 16.08.16 or latest.

1. Goto table menu, and create a table for form request.

Example: **"contact"**

**Tables**

Item has been successfully saved!

**General** If You don't want to displaying on apps select no page.

Current Table: \* Edit table "Contact" | Need Column: - 3 column | **Overwrite**: No Page (Only Need table)

**Properties** Create a table for forms request

**Singular/Table Name SQL**: contact note: change title will be create new table

**Template for Data Listing**: Manual | **Template for Single Data**: Manual | **Manual Code**: Default

**Color**: Dark | **Source JSON**: Offline (In App) | **1st Variable**: [ ]

**URL List Item**: http://domain/json/movies | **URL Single Item**: http://domain/json/single\_movie? | **Parameter**:  Dynamic on 1st param

**Column**

**Warning!**

- Column for **ID** only allow one column the 1st column
- Only for manual code, column for **thumbnail**, **avatar**, **button** or **icons** should be on the 2nd column, after the column ID. and to use template use the type of data in accordance in template name (text in brackets)
- Use a letter as the first character of the variable. ( don't start variable with numbers )
- Make the variable readable ( blank variable not allowed )
- For variable only the characters a-z and spaces allowed.
- Columns of type text can be custom, example **price**: \${txt}/pcs will displaying **price: \$5/pcs**
- 1st variable filled only if data json like this {featured:[{...},{...}]} then you must fill .featured

Create column for form input, don't forget add id

| Label | Variable | Type    | List              | Detail                              | Source                              |
|-------|----------|---------|-------------------|-------------------------------------|-------------------------------------|
| +     | id       | id      | ID                | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> |
| +     | subject  | subject | Heading 1 (title) | <input type="checkbox"/>            | <input type="checkbox"/>            |
| +     | message  | message | Trust As Html     | <input type="checkbox"/>            | <input type="checkbox"/>            |

**Relation To Table**: none | **Fetch Per Scroll**: 1 | **Sample Data**:  Generate Sample Data

Then click **Save** Button.
