

Insert fontAwesome to project

1. Download fontawesome <http://fontawesome.io/>
2. Unzip and then copy to folder: “\output\your_project\www\data\”

3. Go to IMA Builder, **Extra Menu** -> **Enqueue Scripts**
4. Then fill out the form Scripts/CSS, url: “data/font-awesome/css/font-awesome.min.css” and Type CSS.

5. Now, you can use “” and please remember default icon is ionicons so you must insert class like this: **fa fa-language**
