

WEBVIEW FOR OFFLINE APP

1. Create apps and menus as usual.
2. Go to Extra Menus -> (IMAB) Page Builder, then Select "Full Webview" modules

3. Complete the required fields, because we will make the games offline, so I created the name of the **games** folder, and the **index.html** file.

4. Then click **Save Settings**
5. Run explorer or finder, then go to folder which described in the instructions:

6. Paste your code, in **games** folder
